

W. H. BECHSTEIN, MOKENA BANK HEAD DIES

Wm. H. Bechstein, president of the Mokena State Bank, one time grain dealer of Mokena and a life long resident of this community, died at his home in Mokena Wednesday morning between midnight and sunrise. He was found dead in bed by his wife.

Mr. Bechstein had been suffering with heart trouble for sometime.

He appeared to be resting comfortably at midnight Tuesday night and his wife gave him a drink of water. He went to sleep again and never woke up.

Mr. Bechstein's condition was believed to have been improving the last week or ten days.

He was born on a farm near Mokena, Feb. 13, 1872. He attended the Mokena public school and a business college in Chicago. Later he entered the employment of John A. Hatch, now also deceased, who operated a grain elevator in Mokena. He was also employed for a time by M. J. Hogan, a grain dealer in Seneca, but in 1902 returned to Mokena and purchased the business of John A. Hatch.

Three years later he sold out to Liess Brothers and purchased a one third interest in Hogan's business at Seneca. In 1907 he returned to Mokena and purchased the coal and grain business he had sold to Liess Brothers. He conducted this business as the William H. Bechstein Grain Company until 1926, when he sold it to Cappel Brothers, the present owners.

He was one of the organizers of the Mokena State bank and its first secretary. He was a director and for the past four years has served as president.

In 1895 he was united in marriage with Miss Emma Cappel of Mokena. To this union three daughters were born. Mrs. Bechstein and one daughter Ruby preceded him in death. In 1922 he was united in marriage with Miss Rose Oswald, also of Mokena who survives him. He is also survived by two daughters born of his first marriage, Mrs. George Cooper, St. Petersburg, Florida, Mrs. Arthur Kreis of Joliet, one brother Robert of Chicago.

Mr. Bechstein was a member of the St. John's Evangelical church of Mokena, was a 32nd degree Mason and a member of the Mokena camp of the Modern Woodmen.

Funeral services will be held this Saturday afternoon at one o'clock from the late home to the St. John Evangelical church with burial in the St. John cemetery south of Mokena.

TINLEY PARK PASSES ZONING ORDINANCE

The Tinley Park village board passed a very important ordinance on Monday night which will mean a great deal to the future of Tinley Park when the zoning ordinance was adopted and passed by the council.

This ordinance establishes a plan for dividing the Village of Tinley Park into districts for the purpose of regulating the location of trades and industries, and of buildings and structures designed for dwellings, trades, industries, and other specified uses, for regulating the height, volume and size of buildings and of structures, and intensity of use of lot areas, for determining the building lines, and for establishing a board of appeals.

The village of Tinley Park is divided into four classes by this ordinance:

- 1—Residence districts for residence use.
- 2—Apartment districts.
- 3—Retail or commercial districts for commercial use.
- 4—Industrial districts for industrial use.

Mokena Man to Manage Orland Dairy Plant

Howard Beagley of Mokena, has been made manager of the Capitol Dairy plant at Orland Park, succeeding Mat Ludwig of Orland who has resigned but will continue to assist Mr. Beagley in his new duties for sometime. Mr. Beagley is well experienced in the dairy plant work, working for the Bowman Co., at Mokena and in Chicago for many years. Mr. Beagley will move to Orland Park about the first of April.

Orland to Have Minstrel Show

A Minstrel Show will be given under the auspices of the Holy Name Societies of St. Michael's church at Orland Park and the Sacred Heart Church, Palos on Saturday, March 16th at the Orland Park school auditorium. The show will be in celebration of St. Patrick Day.

Chicken Thief Beats Up Orland Man

That it is not always best to try and catch a thief unless you are going to treat them rough, was the sad experience of Christ Brandt, Orland township farmer who was set upon by a chicken thief and given a very severe beating.

According to the story, Mr. Brandt has his chicken house connected up with his house by a burglar system. Last Monday morning about four o'clock the alarm sounded and Mr. Brandt hurriedly arose, dressed and grabbed his shot gun and set out on the trail of the would be purloiner of his chickens. When he got in front of the chicken house he heard someone inside and called out to the intruder, but there was no reply, whereupon, so the story is told, Mr. Brandt fired a charge into the chicken house. Immediately confusion reigned within and suddenly a window pane was shattered and a big, bold bad chicken thief said to have been powerfully built, emerged and sought refuge between the corn crib and another building. Not content, Mr. Brandt followed up the thief who by this time was heading thru the barn yard toward the road. The chicken thief suddenly turned on the surprised Mr. Brandt, kicked the latter in the stomach and tore the gun out of his hand and then beat him up most unmercifully. In his dash thru the yard the thief got tangled up with a clothes line and lost his hat. Mr. Brandt says he saw the thief was bald headed. The bold burglar had a car parked near the farm and after beating up the farmer he hopped into the car and made a clean get away but he did not get any chickens. The best way to capture a chicken thief is to shoot first and ask questions afterward.

Orland Town Politics Get Warm

Politics are beginning to buzz in the town of Orland and a number of aspirants for public office are being heard from.

The tax muddle in Cook County is creating an unusual situation as far as tax collectors are concerned. In the case of Fred Yunker the present tax collector he was elected for a three year term and has made two tax collections, but the third collection will not be made until either in July or August on account of the revaluation work now going on in Cook county must first be completed before any taxes can be collected. This means that Mr. Yunker altho elected for three terms now only has a two year term unless he is re-elected this spring, consequently Mr. Yunker has his hat in the ring once more and is seeking re-election to the office of tax collector of Orland township.

Clarence E. Beagley, electrical contractor and radio dealer of Orland Park is also in the race for this office. Charles Doctor is a candidate for re-election to the office of supervisor, while Martin Smith is a candidate for re-election to the office of assessor and Joseph Creer is out for his old job as town clerk.

ORLAND P. T. A. PLAY A BIG HIT

The five act comedy-drama "Al. Martin's Store" presented by the Orland Park P. T. A. at the Orland school auditorium Tuesday night of this week, was a screaming, howling success. The auditorium was packed so that even standing room was at a premium. Even the hallways and the walks entering the school were packed. The show was highly interesting and was admirably presented by excellent home talent actors.

There is no gainsaying that Orland Park has real dramatic talent. The P. T. A. feels very grateful for the fine support accorded their efforts.

Colation Ticket For Bremen Twp.

Town politics in Bremen township are beginning to boil. A colation ticket has been formed and Charles Nielsen of Tinley Park is a candidate for assessor on this ticket. George Smith, motor cycle cop of Tinley Park has announced him self a candidate for constable for Bremen township.

NAME MOKENA ZONING COMMISSION

The village board of Mokena at their meeting last Wednesday night took up the zoning ordinance matter again and appointed a zoning commission which will recommend to the board what sections of the village should be zoned for residence and business purposes. Among those named on the committee are: Ona McGovney, Albert Braun, D. Kolber, Dr. E. G. McMahon and R. Hensel.

Herbert Folkers Enters Joliet Politics

Attorney Herbert Folkers formerly of Frankfort, now a resident of Joliet is going to be a candidate for justice of the peace for Joliet township on the Republican ticket at the Joliet town election next month.

The Town Doctor

SAYS

Every thinking citizen wants to see his community grow, and most people are willing to get behind and boost. But from the letters people write me, it appears that they do not know HOW or WHAT to do, or what to keep from doing.

The problem that confronts every community is one of SELLING; you have to SELL your town—sell people ON your town.

It sounds simple—and it is simple—when you know HOW.

A few years ago I had the pleasure of conducting a campaign to sell a state. In practically every town someone would say, "That's simple and sounds like a good idea, but who'll buy it?"

The procrastinator and the fellow who was satisfied with things as they were would say, "This is a pretty good town why sell it?"

And the knocker would chime with, "That is a good idea. Sell it and get rid of it."

Then there was the individual who said, "Wal, we been gittin' along all these years without it, why should we change now?"

Perhaps you think the same, as pertains to selling your community, but regardless of how you feel or think, the fact nevertheless remains that you MUST SELL your community.

THIS TOWN DOCTOR ARTICLE, ONE OF A SERIES OF FIFTY-TWO, IS PUBLISHED BY THE NEWS-BULLETIN IN COOPERATION WITH THE TINLEY PARK LIONS CLUB.

Tinley Doctor Is Public Benefactor

Many citizens of Tinley Park feel that the community owes much to the fine public service rendered by Dr. Ickstadt of Tinley Park by way of inoculating the pupils and teachers with toxin anti toxin serum and which has kept them immune from diphtheria and other diseases this winter. Dr. Ickstadt not only procured the serum but administered it free of charge. This serum is said to keep a person immune from diphtheria from five to seven years, and in some instances even for life.

Dr. Ickstadt is to be highly commended and thanked for his deep interest in the health of his community and for his contribution to safe guard it.

This is real community service as well as a fine showing of the community spirit that is so much needed in our towns and lives.

Tinley Has New Real Estate Office

Clarence H. E. Goessel, formerly employed in a sales capacity for the Frederick H. Bartlett Realty Company of Chicago, announces the formation of a new real estate brokerage firm operating under the firm name of The Clarence H. E. Goessel Realty Company, handling, sales, renting, property management, exchanges and appraisals. The firm's home office is located at Tinley Park, Illinois.

60 Men Revalue Bremen Twp.

Every foot of property in Bremen township is being measured and re-recorded and maps are being made of all premises. A force of sixty men is now engaged in this re-valuation work on the farms of Bremen township. The work in the village of Tinley work has been nearly finished.

The re-valuation squad has hired a number of local people to assist them in the work. At present the squad is using the Tinley Park village hall for their headquarters. The work is to be finished within another week or so.

Pure Milk Asso. Meets March 12

Regular annual meeting of the Pure Milk Association will be held in the Grand Ball room of the Morrison Hotel in Chicago, Tuesday, March 12th at 10 a. m.

Dr. Clyde L. King, the Chicago arbitrator, will speak in the afternoon at a joint session of the Association and Chicago Milk Dealers. Luncheon will be served at noon in the ballroom and each local is asked to forward their reservations as soon as possible, that the committee may know how many to prepare for.

The Northwestern from Brooklyn will have a special train carrying delegates to the annual meeting. At least two thousand are expected to attend the meeting which will be in the nature of a celebration of the recent dairymen's victory.

Dairymen at Mokena are urged to send in their reservations as soon as possible.

March 14—John Klein, Orland

Mokena News Notes Mokena Youths Plan Airport

FIRE CAUSES SLIGHT DAMAGE

Sparks flying from a chimney caused a fire which burned a small hole in the roof at the home of Wilard Marti in Mokena Sunday morning. The volunteer fire fighters were aroused about two o'clock by the piercing screams of the fire siren. Mr. Marti had stirred up the fire in the furnace, and noticed that sparks were flying, but they soon died out and he went to bed.

A short time later Howard Scheiblich and Herbert Hohenstein who were returning from a dance, discovered the roof near the chimney burning quite vigorously and they turned in the alarm. The volunteer fire department and nearly the entire population of Mokena were soon on the scene of the fire and soon had it under control.

The damage was estimated at about \$50.

MOKENA PUPILS HOLD SPELLING EXERCISES

The students of the upstairs rooms enjoyed an hour and a half of pleasure Friday afternoon, March 1st. They had a circular spelling contest in which Milton Woodrich was the winner. They then had a spelling contest, the boys against the girls, and of course, the boys won. The remaining standing were Louella Story, Milton Woodrich, Lester Warning and Clarence Laufner.

SPELLING CONTESTS CREATE KEEN INTEREST IN SCHOOLS

Last Friday, March 1st, the schools of Cook County, which are under the supervision of Edward J. Tobin as superintendent, held their preliminary spelling and declamatory contests. Owen Maue and Evelyn Erickson were the winners in the spelling contest in District No. 138, each with a perfect score. Violet Knudson was the winner of the declamatory contest. Violet won a township championship banner last year in the declamatory contest. These pupils will go to Orland to try for the township championship in the spelling and declamatory contests. Mrs. Woodrich is the teacher in district 138.

MOKENA SCHOOL CHILDREN LISTEN TO INAUGURATION

On Monday, March 4th, the pupils of the high school, seventh and eighth grades, and of the intermediate room, together with their teachers, went to Sippel's store and to the Hommerding & Martie pool room, where they listened to the inaugural ceremonies at Washington as broadcasted over the radio. The ceremonies began at 10:45 a. m. The pupils of the primary room were dismissed for the noon hour at that time. The boys of the high school and the seventh and eighth grade room went to the pool room to listen in, while the rest of the pupils went to Sippel's store.

The wonderful possibilities of the radio in education have just begun to be realized. Report has it that the new school will be equipped with a radio. It is hoped that this report is true. The pupils will not then have to go elsewhere to listen in.

MOKENA SCHOOL BALL TEAM

Should you pass the schoolhouse anyone of these fine days, you will see the first sign of spring and one which never fails, the first baseball practice.

The Mokena school team in the past two years, has won nine games out of ten. The one lost was the second game played against Man-

Model aviation has progressed a step farther with the organization of a club at the Joliet High school the past week. The first meeting will be held this Friday.

Mr. Stone's model making class ended last Friday with nearly all the students making the required 30 seconds endurance which is necessary for passing.

This year the High School is trying out a ground school course which will be recognized by nearly all flying schools. This will give students a chance to become acquainted with the theory and practice of aeronautics.

In Mokena, Carlos Hall and Leon Kolber are working on a number of planes and when the weather clears they expect to start a model airport with hangars and beacons fully equipped as to landing lanes, and runways, the same as a large airport.

If the boys in town would become interested they would find a very fascinating as well as an instructive pastime. A model airport with hangars and repair shops will be an attractive feature. Let's go, boys.

John Klein To Sell Prize Herd

John A. Klein, well known and noted stock raiser of Orland township, is going to replace his present herd of dairy cattle with pure bred Holsteins, and will sell his present herd of high grade Holsteins at public dispersal sale on March 14.

This herd was given national honor by the National Dairy Association as being one of the first herds to average 347.7 lbs., of butterfat per cow for one year. In the Cook County Association Number two the herd led in butterfat production for the year 1928.

hatten. This spring six games will be matched and it is hoped to win them all.

The team this spring will be the same as it has been during the past two years, the only man lost in that time being Hohenstein, catcher last spring. However his place is well filled by Brown, who was shifted there from short stop. Walsh will probably be at first, McGovney at second, Cappel at short, and Martie at third. In the outfield there will be the biggest fight for positions with Muff, Warning, Woodrich, Muehler and Sippel of last year's team and Harms a new comer, all trying for positions. Hommerding will be the pitcher again this season.

PUPILS HOLD CONTEST

Last Friday afternoon, pupils from the upstairs room gathered in the 7th and 8th grade room and had a spelling contest, consisting of two separate matches. The first was a novelty contest and the second the boys spelled against the girls. In the first contest Milton Woodrich was the victor. In the second event the boys were the winners. There was not time to finish the second contest but the percentage was figured and the boys had a smaller per cent of misspelled words than the girls. There was one girl Louella Story, and 3 boys, Lester Warning, Milton

Tinley Garden Club Votes on National Flower

The president of the Garden Club of Illinois, the curator of the New York Botanical Gardens and one of the officials of American Nature Association of Washington, D. C., have asked the Tinley Park Garden Club to cast their ballot for a National Flower.

In response to this request at the last meeting of the Tinley Park Garden Club, which was held at the home of Mrs. Henry Kehres, club members cast their vote for the columbine. This flower is a native of the United States and blooms on three of our national holidays, namely Decoration Day, Flag Day and Fourth of July, and comes in colors of red, white and blue.

The name columbine suggests Columbus and Columbia, coming from the Latin word "Columba" meaning dove. Aguilera, means Eagle, and the general shape of the flower suggests the Liberty Bell. It is strong and hardy and easily transplanted.

Practically every nation in modern times boasts of some plant symbol, except ours, the United States. We have our Flag and our American Eagle but no flower for the United Coat of Arms. Therefore, a bill naming the leading flower will be presented to Congress.

—NOTICE—

Our place of business will be closed this Saturday from 12 o'clock to 3 p. m.

CHAPTER VII—Continued

—19—

From his belt the wizard next pulled a long arrow and apparently thrust it down his throat up to the feathers. I had accepted the knife-swallowing as being genuine, for I had seen a white man do it; but the barbed arrow I could not accept. Beaujeu whispered to me:

"Little Wolf is a cunning rogue. The reed shaft is made of short sections which are driven together when he holds the barb between his teeth and presses down. But applaud him generously. Should he make the Voice in the lodge tell the Indians not to fight against Braddock, we would find ourselves without a red force."

We clapped our hands and pressed them to our lips, and Little Wolf was much pleased. Picking up the bow and red-tipped arrow, he sang a song in which were repeated several times, "Scarlet is its head."

I became keenly interested when, after a slight pause he fiercely shouted: "It finds its way into a Wolf."

He held the arrow so those staring in at the window might look on it, and among the spectators was the circle-covered visage of Round Paw. The wizard had uttered a threat three times during the last hour, and a "wolf" was always the victim. The dead bear had been accepted as a symbol for Braddock's army.

I did not believe the sachem meant the English when he promised death to a wolf. But I was convinced that the fellow for some reason intended harm to the Onondaga. There must be a logical cause for this professed enmity, and naturally I believed my friend had incurred suspicions. I dared not attempt a signal although I did glare into the Onondaga's eyes. Little Wolf gathered up his belongings to retire, but Beaujeu detained him by inquiring:

"Why does not the great wizard shoot the medicine-arrow into the wolf now?"

The Onondaga allowed two braves to crowd in from each side so only his head partly showed between theirs.

"A ghost in the medicine-lodge will shoot it. It will find its way to the Wolf."

Those at the window were very quiet, their eyes glowing as they began to sense a dramatic climax.

"Onontio's sons wish to see the arrow when it finds its mark," insisted Beaujeu. He too had detected some significance in the fellow's mysterious talk.

"Onontio's sons cannot see the ghost. Only medicine-eyes can see that. Their eyes can see the arrow when it goes through the Wolf's neck. Their eyes can see that without their moving from their places."

We crowded closer together so that all might have a fair view of the lodge, and the savages at the window drew aside. A fire was lighted on each side of the lodge so as to illuminate brilliantly the front of the structure. Beaujeu whispered:

"Little Wolf is now inside. But name of the devil! What did he mean about his arrow finding a wolf? One can never tell how the red mind is working."

"He may have an enemy he wishes to kill and credit the killing to a ghost," I suggested.

Maybe, I hope not. If their minds start running away with them they'll outrun a wolf-pack in getting back to their northern villages. However, it can't be serious. Pontiac must know what he meant and approves; and Pontiac is one leader I will count on."

The drum thudded monotonously for two or three minutes, gradually increasing in volume, then abruptly ceasing. A weak voice, talking in the language of the Delaware, called out:

"What do my children want? Why do my children call me back to this lodge? I am the first of your grandfathers. You have called me over a long path."

There followed the shrill voice of a woman, but in a tongue I did not understand. Next the wizard's voice, husky and labored, entered the dialogue, and in Delaware he asked:

"O Grandfather of all the red people, tell us of the Ingelishman. Is he strong? Will he fight strong? Will your children be struck in the head?"

"The answer to that can easily spoil all my plans!" gritted Beaujeu.

The medicine-lodge rocked and swayed as if buffeted by a mighty wind. Discordant noises arose—evil forces striving to prevent the Voice from answering. There sounded the barking of dogs and the scream of the panther and the piping wail of a child. A fearful visage showed for an instant at the small opening and was succeeded by another. Then with a single booming note from the medicine-drum silence returned to the lodge. After a few moments the weak

voice of the first of all grandfathers spoke, saying:

"Little Wolf is a mighty wizard. He drives away the black spirit that wants to stop my mouth. I am the first of your grandfathers. I tell you this—the floor of the forest will be red with the blood of the Ingelish. The Manito is angry to see his red children losing their villages and land. Let the arrow find the false Wolf and then go into battle without fear."

Silence again, and Beaujeu wiped the sweat from his brows and muttered:

"Nom de Dieu! What devilry is he up to? It's some of Pontiac's work. He should have told me first. Getting a fight out of the Indians is conditional on their killing the 'false wolf.' Monsieur Beland, I fear you are right. Little Wolf has a rival. If so he must kill him, or else the flag of France must be lowered."

He became silent as from the lodge came the voice of Little Wolf. It

"The English Spy."

sounded very weak and we had to strain our ears to catch his words. Panting for breath he called out:

"The Voice is very far away. I can hear it, my brothers cannot. It rests but will come very soon— Wait. The little white dog is barking. He is leading the voice back."

Another pause and then we heard the yelping and ki-yling of a puppy. Then came the voice, this time sounding much louder. It commanded:

"Have the warriors who danced about the war-post pass around the lodge four times, and let each ask himself if he is a true man."

"Ah! Now it develops. Soon there will be a killing," hissed St. Therese.

There followed more shaking and swaying of the lodge. Pontiac's voice rang out, calling on the dancers to fall in line and begin circling the lodge and for men with straight tongues to fear nothing. Painted faces in profile began passing the window. Each savage kept his face averted from the lodge and each seemed to step in greater haste when abreast of the small opening. I sought the Onondaga in the long line, but failed to behold him. I took note of the first man to pass the window, and when he appeared for the second time there sounded a gurgling cry from the interior of the lodge, after which the sides flapped and fluttered violently and the long-drawn-out howl of a wolf took the place of the puppy's yapping. The savages quickened their pace until they were moving almost on a run. The barking of the little white dog came back, followed by a deep voice chanting:

"Ha-hum-weh!"

I held my breath and waited for the

climax, whatever it might be. Beaujeu whispered:

"I think it is our friend, who stands at the door talking with the young Englishman with the French heart. The young man is timid. He will not come in unless strongly urged. Ah! Excellent. It is our friend, the good Beauvais. He presses the young man to enter. When this damnable marching and yowling stops I will call out for the stranger to join us and become better acquainted."

I turned my head slowly, my heart thumping like an Indian drum. Beauvais stood with his back to us. He was speaking very earnestly to the Dinwold girl, one hand resting on her slim shoulder. He was trying to induce her to enter and she was striving to detain him. I gathered my feet under me and made ready to leap over the table and to trust to luck in plunging through the window and into the red mob. Beauvais straightened and removed his hand from the girl's shoulder and started to turn about and enter the room. The girl seized his arm and frantically essayed to hold him back. He was motionless for a moment, as if amazed at her action; then shook off her grasp and stepped backward through the door.

The Onondaga's terrible war-whoop jerked my gaze to the window. The front of the lodge bulged far out, and the Frenchmen, as well as I, exclaimed in astonishment as a fluttering mass of something that looked to be neither beast nor human, emerged from the structure and dashed through the fire-light and came flying through the window.

A startled cry at the door caused my head to swing in that direction. Beauvais, now glaring at the table, was pointing a finger and yelling:

"Seize the Englishman! Braddock's spy!"

Several things were happening simultaneously which I can narrate only as separate incidents. My companions sat stupefied as Beauvais called out, for even as he was sounding the alarm the muffled figure from the lodge rushed toward him and with a swing of a blanket extinguished the candles on that side of the room.

"The English spy!" hoarsely called Beauvais, and then went down with a crash as the muffled figure bowled him over and with a quick turn raked the candles from the wall behind me, leaving the illumination of the room confined to the light from the fires outside.

Beaujeu's brain resumed working.

"Treachery!" he screamed.

I heard his chair tip over as he sprang to his feet. But none at the table knew wherein lay the treachery as was proved by the failure of the company to lay hands on me. Or possibly all were so dumfounded they could not for the moment take intelligent action. Something crashed against my chair, and over went the table. I felt a muscular arm slip around my waist. A blanket fell over my head. The next moment we were tumbling through the window and into the midst of the pandemonium now reigning outside. I freed my face enough to see the Indians scattering and falling back from the lodge. Pontiac's voice was thundering:

"Surround the lodge!" But there was none among his followers who dared to draw close to the sacred structure.

My conductor pressed heavily on my shoulder and we went to our knees and crawled under a flap of the lodge, and the light from the fires in front briefly revealed the distorted face of Little Wolf. His red medicine-arrow was through his throat, the head and several inches of the shaft showing under his left ear.

"Ha-hum-weh!" chanted my rescuer.

The red arrow had been discharged in the medicine-lodge even as Little Wolf had prophesied, and it had found its way into a wolf, but not into the man of the Wolf clan as I had feared. We had no time to linger. From the uproar outside, I assumed that the Indians were still bewildered and believing that the startling appearance of the muffled figure outside the lodge and its flight through the window was but the workings of the wizard's manito.

Even now, with the Frenchmen stumbling about in the commandant's house and calling for lights, with Beauvais madly shouting that there was an English spy inside the stockade, and with Pontiac darting among the terrified red men and fiercely exhorting them to catch my friend the Onondaga, we yet had time to take advantage of the confusion and make off into the darkness that encroached up to the rear of the lodge. Round Paw pulled the blanket over my head and drew his own covering closer, and seizing my arm raised the rear wall and pushed me before him.

(TO BE CONTINUED.)

Laments Passing of the "Good Old Times"

Times have changed and people have grown so serious that the old delight in holidays has vanished, is the complaint voiced by the writer of an editorial in Liberty Magazine.

"April Fools' day was one of the bright spots of the year," points out the editorial. "There was a brick under the hat; the stuffed pocketbook with the string tied to it. Breakfast muffins filled with cotton were a rare jest, and so was candy shot through with cayenne pepper. It was a long time anticipated and long remembered, as were St. Valentine's day, Christmas eve, Halloween, and the night before the Fourth of July. On Thanksgiving we went to grandmother's house and ate gorgeously. There aren't such

grandmothers any more, or such cranberries.

"Christmas now means bills to meet," continues the disillusioned writer. "Independence day has been made a Sane Fourth. We no longer get any fun out of April Fools' day. Those unofficial childish holidays were a kind of possession peculiar to the past. They are not the same now. We are grown up and serious, and times have changed."

For Your Scrap Book

There are two kinds of writing, both great and rare; one that of genius, or the inspired, the other that of intellect and taste, in the interest of inspiration.—Thoreau.

For Colds —

How many people you know end their colds with Bayer Aspirin! And how often you've heard of its prompt relief of sore throat or tonsillitis. No wonder millions take it for colds, neuralgia, rheumatism; and the aches and pains that go with them. The wonder is that anyone still worries through a winter without these tablets! They relieve quickly, yet have no effect whatever on the heart. Friends have told you Bayer Aspirin is marvelous; doctors have declared it harmless. Every druggist has it, with proven directions. Why not put it to the test?

Aspirin is the trade mark of Bayer Manufacture of Mononaceticacidester of Salicylicacid

Slaughter by Any Name

The report of the Pennsylvania game commission shows that 25,097 does were killed in the open season last year, a total less than had been first predicted. The course is defended as "necessary to reduce the deer herd to a size commensurate with its natural food supply."

But this solution of the Malthusian problem in deerland stirred up as much criticism as the original theory when first applied to the human race one hundred thirty years ago.

Who Wouldn't Be?

Green—What's Phunnie so doggone crabby about these days?

Brown—Oh, he wrote a lot of jokes about the income tax and he made so much money on them that he had to pay an income tax himself.

Aging in College

"So you sent your son to college? What is he doing there?"
"Aging."

Research Has Large Place in U. Program

Equal in Importance With Teaching in Medical College.

Research, that effort on the part of scientists to discover new and better ways of doing things which, in medicine, usually leads to longer life or the eradication of disease, occupies a large portion of the time and energy of the staff of the University of Illinois College of Medicine in Chicago.

Of equal, or of greater importance than the teaching phase of medical work, research investigations the world over have brought to light the great discoveries in medical science that have saved millions of lives in the course of years. The mention of the stamping out of yellow fever in the tropics, the great reduction of typhoid fever by modern sanitation and anti-toxin, and many others equally well known illustrate these discoveries.

Among the recently announced pieces of research work by members of the University of Illinois College of Medicine faculty are included the discoveries of Dr. A. E. Boyden, associate professor of anatomy, in relation to the action of the gall bladder under various physical conditions; that of Dr. Lloyd Arnold, associate professor of bacteriology and preventive medicine, on the functions of the respiratory system and the alimentary canal in reference to their disinfective powers; that of Dr. Julius H. Hess and Dr. I. M. Chamberlain of the department of children's diseases, in feeding of infants; that of Dr. William H. Welker in urinary proteins, as a result of which a new theory with respect to the causes of nephritis has been advanced; and the isolation of the five proteins in the white of eggs by Dr. Arthur G. Cole of the medical staff.

In Dr. Boyden's work, for which he received the William Beaumont Memorial Prize in 1928 for the best piece of original work in the study of diseases of the alimentary tract, he showed conclusively that the gall bladder, which had been formerly considered an almost useless part of the body mechanism, did have a definite use in adding the proper digestion of food. He discovered that the gall bladder filled and emptied itself regularly preceding and during mealtime, thus demonstrating that the gall had a definite digestive function. He also discovered that if cream and egg yolks were fed to a person, the gall bladder would empty itself in a very short time, much more quickly than if a meat meal were given. In the latter case the bladder was little affected.

Using the Graham method of visualizing the gall bladder by means of the X-ray, he discovered that the bladder's real purpose was to store up bile before a meal and, during the first part of the meal, to pour the bile into the intestines. He discovered that certain mineral salts had approximately the same effect as did the cream-egg yolk meal. These studies had for their ultimate purpose the explanation of the conditions underlying the formation of gall stones. Doctor Boyden's studies have been extensively reviewed by eminent authorities on this subject in the most recent scientific books on the digestive tract.

Dr. Lloyd Arnold has made extensive studies into the ability of the upper part of the alimentary canal to thoroughly disinfect itself. The living membrane of the upper part of the tract destroys the germs that come into the body by way of the mouth and also kills the bacteria that ascend into this level from the lower end of the alimentary canal, he has discovered. This power of the upper part of the tract to cleanse itself of germs helps materially in defending the body against bacteria brought into the body through breathing, by swallowing milk, or water, and in various other ways.

A work characterized by an outstanding medical scientist as "the greatest contribution to our knowledge of the kidney and to our knowledge of nephritis since the time of Bright, is that of Dr. William H. Welker in his work in urinary proteins. This great work lays open a new possibility for the study of the real cause of nephritis and possibly a future preventive or curative procedure.

That the addition of a small amount of orange juice to cow's milk makes the milk much more digestible for infants has been demonstrated by Drs. Julius H. Hess and I. N. Chamberlain of the Department of Children, after a long series of experiments. The addition of the orange juice changes the chemical composition of the milk, introduces vitamins which promote growth and prevent the development of scurvy, and reduce the size of the curds that are found in the baby's stomach during the process of digestion. The introduction of orange juice into the baby's milk may be started as early as the second or third week. Boiling and cooling of the milk before the juice is introduced is the most satisfactory way of preparing it. They also found that the introduction of egg yolk in addition to the orange juice materially increased the iron content of the milk.

One of the most delicate series of experiments performed that yielded fruitful results were those done by Dr. Arthur G. Cole of the medical staff in which he was able to isolate all five of the proteins present in the white of egg. Only four had been definitely known up to this time. The five proteins constitute the total protein content of egg white, one of the foods particularly rich in proteins.

This work is of great value to science in that it is an aid to other research which, in turn, will be of benefit to mankind.

Farm homes of Illinois sent about one-eighth of the students to the University of Illinois this year, while the remainder are from cities, 1928-29 enrollment figures for both the down-state and Chicago departments disclose. Approximately half of those from cities come from cities of over 25,000 population with Chicago heading the list with 3,000 enrolled.

FRANKFORT

The Aime Sewing Circle met in the home of Mrs. George Elsnier Tuesday evening. Pinocle was played at three tables and prizes were awarded to Mrs. Herbert Gullickson of Joliet and Mrs. Henry Breidert. Refreshments were served.

Miss Mildred Stephen of Chicago visited here recently with her parents, Mr. and Mrs. Robert Stephen. Harold Pfeifer of Delaware, Ohio returned home Sunday morning. He has just finished laying 20 miles of steel rails in the east with a gas and electric rail layer on the Hocking Valley railroad.

John Bettenhausen and R. Kirby returned from California where they have been spending several weeks.

Mr. and Mrs. Charles Pfeifer and daughters Ella Marie and Burnetta spent Sunday in Chicago with Mr. Leo Keller formerly of Frankfort.

Mrs. Minnie Fink entertained the afternoon pinocle club in her home Friday. Cards were played at two tables. Prizes were awarded as follows: 1st Mrs. Homer Smith; 2nd Mrs. Christ Fink.

Refreshments were served by the hostess.

The Frankfort basketball team defeated the Matteson team Thursday evening at the Frankfort hall.

Christ Heisner of Denver, Colo., is visiting here with his brother and other relatives.

Mr. and Mrs. George Mark of Green Garden are ill with the mumps.

Mrs. Mary Eisenbrandt who underwent an operation in Silver Cross hospital last week is improving in the home of her sister, Mrs. Wm. Block where she was taken after leaving the hospital.

Mrs. William Folkers and Mrs. John Clark spent a few days this week with Dr. Paul Clark and fam-

ily in Marsiells, Ill.

Wm. Kampe and family, Mrs. J. Kampe and Florence Weichbrodt are expected home soon from St. Petersburg, Florida where they spent the past three months.

Mrs. Fred Woodcock of Manhattan spent Monday at the home of her brother, Charles Pfeifer.

Mr. and Mrs. Bartel Heisner entertained in their home Thursday evening in honor of their daughter and son in law, Mr. and Mrs. George Kratzberg's fifth wedding anniversary. Games and contests formed the evening diversion until mid-night Supper was served.

John Rehberg and daughter Gertrude moved to their farm in Green Garden last Saturday. Mr. and Mrs. George Geuther, Jr. moved into the Rehberg house.

Mr. and Mrs. Harlan Eisenbrand moved into the Schroeder house vacated by the Geuthers.

Mr. and Mrs. Arthur Shubert of Joliet moved into the Charles Pfaff Sr. flat over the barber shop.

Mrs. Albert Baumgartner is staying with her daughter, Mrs. Alfred Zechlin at the present time. She is improving nicely from her recent illness.

Bible pictures will be shown in St. Peter's church Sunday evening, at 7:30 o'clock.

Next Sunday services at the M. E. church will be as follows: Sunday school at 9:45 a. m. Services at 10:45 a. m. Rev. Samuel Weishaar will be in charge.

Services at St. Peter's Evangelical church; German services 8:30 a. m. Sunday school at 9:30 a. m. English at 10:30 a. m. Rev. G. S. Gerhold, pastor.

Walter Cheney who has been ill the past week is able to be out again.

Mrs. Christ Howk of Joliet spent several days here with her brother and sister-in-law, Mr. and Mrs. Jake Feil.

PROBATE NOTICE

ESTATE of William H. Peters, deceased.

The undersigned having been appointed Executor of the last Will and Testament of William H. Peters, late of Frankfort, in the County of Will and State of Illinois, deceased, hereby gives notice that he will appear before the Probate Court of Will County, at the Court House in Joliet, at the April Term, on the first Monday in April next (being the first day of said month), at which time all persons having claims against said estate are notified and requested to attend for the purpose of having the same adjusted. All persons indebted to said estate are requested to make immediate payment to the undersigned.

Dated this 20th day of February, A. D. 1929.

MAX F. HAASS,

Executor, as aforesaid.
Albert H. Krusemark,
Attorney.

Tires for the new Ford are specially made to give long wear

WHEN the new Ford was designed, it was immediately apparent that a new tire would have to be made to match the car's performance. It was distinctly a new problem; for here was a car with quicker acceleration, greater speed and more braking efficiency than any car of similar size or weight.

So that every Ford owner might be assured of maximum tire mileage at the lowest cost, the Ford Motor Company devoted many months to research and experiment in conjunction with the leading tire manufacturers.

As a result, certain definite specifications were developed for tires for the new Ford. These specify cords of certain strength and texture, a large volume of tread and side-wall rubber, sturdy non-skid design, and reinforced plies for protection against bruise breaks—all the strong features of construction formerly considered for only the largest tires.

Great care also was taken to secure the best riding qualities in connection with the transverse springs and the Houdaille shock absorbers.

Though the Ford tires are designated as 30 x 4.50, they have the resiliency and air space of much larger tires because of the drop center rim of the steel-spoke wheels.

For best results, the tires on the new Ford should be kept inflated to an air pressure of 35 pounds and checked regularly to insure this pressure all the time. This is important. Low inflation breaks down the side-walls of a tire. By causing overheating, it also destroys the rubber that acts as an insulation, with consequent separation of the cord.

At the end of each 5000 miles, when you have the front wheels packed with grease, it is a good plan to have the wheel alignment checked. This will prevent premature wear.

When punctures come, as they will with any tire, you will find the Ford dealer particularly well-equipped to make repairs quickly and at small cost. See him, too, for replacements. Then you will be sure of getting tires built specially for the Ford car according to definite Ford specifications.

FORD MOTOR COMPANY

Use this Convenient October Payment Plan And Enjoy GAS HEAT NOW!

RATHER than order more fuel to finish out the season with your present heating equipment, why not consider an immediate installation of gas heat?

You will find it especially enjoyable during changeable spring weather to have an automatic gas heating system, which maintains an even and comfortable temperature without the usual "chills and fever" of non-automatic fuel feeding.

Write your name on a margin of this advertisement and send it to us. A representative will call, make an estimate of the cost of heating your home with gas, without obligation to you, and explain fully the October payment plan. By using it, you pay only one-fourth of the cost now, and postpone three-fourths until October at which time you may arrange to complete payment "Little by Little" if you wish.

BANKERS IN NATIONAL MOVE FOR UNIFORM FINANCIAL PRACTICES

**Would Promote Greater Consistency Among All the State
Laws in Respect to Banking Conditions—Uniform-
ity of Practice and Understanding Will Make
for Greater Convenience, Efficiency
and Safety for All Business.**

By S. J. HIGH

President State Bank Division, American Bankers Association

RAPID interchange of business and the quick transportation of goods in the United States, coupled with almost instantaneous means of inter-communication by telegraph, telephone and wireless, have welded the country into an economic unit. The nation is not, in a business sense, conducting its affairs in water-tight compartments, as in a measure it did in the days of slow travel and remote places, but styles, methods, commodities and business practices flow freely today in all directions. Therefore it is desirable that finance, trade and industry throughout the country operate along generally uniform or at least consistent lines, so that a contract or an agreement or obligation in connection with business transactions shall mean virtually the same thing in all parts of the country. Particularly necessary in this connection is the establishment of uniform financial and banking practices so as to facilitate the flow of trade along accepted and understood lines.

S. J. HIGH

Banking in the United States is recognized as a semi-public type of business and is therefore subject to laws to define the scope and character of its activities. A great diversity of conditions

to law under and by virtue of a judgment rendered against said lots and lands, severally, for the delinquent general taxes, special assessments, interests, penalties and costs, severally due and unpaid thereon, duly made at the place of holding Court in the said County of Will and State of Illinois, on the 28th day of June A. D. 1927, J. W. Parker did then and there purchase, the following described piece or parcel of land or lot, situated in the County of Will, State of Illinois, to-wit:

S 1/2 Lot 16 Joseph Fenders Subdn. Blk 1 Canal Trustees Subdn. W 1/2 Sec. 9 Twp. 25 Range 10 for the delinquent general taxes levied and assessed thereon for the year A. D. 1926 said land or lot or parcel of land or lot taxed in the name of May E. Becker and the time allowed by law for the redemption of said real estate from said sale and purchase will expire on the 28th day of June A. D. 1929.

J. W. PARKER,
Purchaser.
Dated at Joliet this 1st day of March A. D. 1929.

N. B. Redeem at County Clerk's these various jurisdictions. This body is conducting a vigorous nation-wide campaign urging that active steps be taken to secure greater coordination in banking legislation, more equitable conditions and more uniformly efficient public supervision of banks in the several states.

The organization is particularly concerned with fostering this movement to bring about more uniformly desirable conditions throughout the United States in respect to the public supervision of banking institutions by the state banking departments. It is on record as favoring the policy that the important office of state bank commissioner should be kept as free from entangling partisan politics as the judiciary itself and should be completely detached from all other functions of state government.

It is also on record as favoring the policy that the tenure of office of state bank commissioners should be made more secure and lasting than is now the case in many state jurisdictions and that this important public officer be granted sufficient compensation and discretionary power so that the office shall attract and retain the services of men of outstanding executive ability and successful banking experience.

It is also a part of this policy that the bank commissioner's ability to serve well should be strengthened by providing him with adequate forces of bank examiners, selected on the basis of merit from men having the requisite qualifications of honesty, ability, training and banking knowledge to carry out the duties of their offices on the highest plane of usefulness to the public as well as to banking.

The Trend of State Laws

The Association's State Bank Division has recently concluded a nationwide survey of state banking legislation and conditions and in general has discovered a definite trend along the following lines:

There is a distinct tendency among the states to raise the minimum capital required for banking institutions to \$25,000 and also to give the bank commissioners or the banking boards sole power as to the granting of charters for new banks, thus enabling them to use discretion as to the need or desirability of added banking facilities or the fitness of the organizers to enter the banking field. In this connection many states are creating banking boards to act in an advisory capacity with the state bank commissioners.

There has also been observed a tendency to increase the compensation of the bank commissioners and to lengthen their terms of office and to give them power to appoint necessary deputies and examiners so as to build up an adequate force to carry out their responsibilities and duties. An important augmentation of the powers of

bank commissioners in some states is found in laws giving them complete charge of insolvent banks and their liquidation as distinguished from more costly liquidation through the courts.

In the Public Interest

Distinctly in the public interest are laws prohibiting or limiting an officer or director of a bank from borrowing from his own bank unless his collateral security is approved by a majority of the board of directors of the bank. Also there is recent legislation noted providing for closer supervision and regulation of building and loan associations, credit unions, finance companies and private banks.

In some states measures have been enacted broadening the field for investment of funds of savings banks and trust companies, which have materially enhanced the service that these institutions can render, particularly in the way of co-operation with their customers in personal financial management. Another type of legislation, important especially to banking in view of the frequent efforts to defraud banks, is that which makes the issuance of worthless checks a misdemeanor with specific penalties. The State Bank Division of the American Bankers Association endorses in the fullest degree in principle the development of banking laws along the foregoing lines and is actively engaged in fostering the spread of such legislation wherever its services are considered useful both to banking and to the public. Uniformly sound banking institutions and practices, together with common methods and understanding, will materially add to the convenience, efficiency and safety of business in serving the well-being of the public in all parts of the nation, especially in those transactions involving dealings between different localities.

AMERICA LEADS THE WORLD IN SAVINGS

The past year saw the greatest gains in savings in a single twelve-month ever recorded in the United States, bringing the total savings deposits in banks to over \$23,400,000,000 on June 30, 1928, held in more than 53,000,000 individual accounts. It is reported by the American Bankers Association. These are the biggest figures in this field shown by any country in the world.

These figures are indicative of prosperity more general than any time since the business depression of 1920, the report declares. Only three states failed to show a gain and the 1928 volume of savings constituted an increase of more than \$2,327,000,000 above the 1927 figure. The gain per inhabitant for 1928 over 1927 was \$17 and the gain in number of savings depositors was 2,496,079, an increase of 5.2% as against a growth in the population of the country of 1.2%.

The gain in savings per inhabitant in New England and the Middle Atlantic states over the previous year was \$36. These groups of states, with 29.9% of the population of the United States and 52.8% of the total savings deposits, have the largest savings rate, \$461 per inhabitant, of any area in the world. The per capita savings for the United States as a whole this year stands at \$237 as compared with \$229 last year.

"An acre of alfalfa for every cow in Howard County, Iowa," is the slogan adopted by the county bankers association there after watching several hundred thousand dollars go out their county last winter for feed

BYRD'S FAREWELL TO HIS MOTHER CROSSES CONTINENT

The last thing that Commander Richard E. Byrd did before leaving Los Angeles on his scientific expedition to the South Pole regions was to make Long Distance telephone calls to his mother, Mrs. R. E. Byrd, at Winchester, Va., and his brother, Governor Harry Byrd, at Richmond, Va.

A special telephone line had been placed on board the whaler C. A. Larsen in the Los Angeles harbor so as to enable the aviator-explorer to say good-bye to his family just before the vessel weighed anchor for its two years expedition to the antarctic regions.

TELEPHONES IN SEATTLE

There were ninety telephones in the city of Seattle in 1884, and only 300 in 1894. This number had increased to 4,300 in 1901, and to 23,000 in 1904. The 50,000 mark was attained in 1914, since which time the telephone growth of Seattle has been very rapid, the number of instruments in use now being more than 115,000.

Telephone Typewriter System Great Aid in Catching Criminals

**New Business Uses Being Found for System Now Used Largely by the Great
Press Associations to Gather and Distribute News.**

Telephone Typewriter Installation at Police Headquarters, New York City.

By means of the printing telegraph service, or the telephone typewriter as it is coming to be known, instant transmission of communications between distant offices, factories, etc., is made available, providing each connected unit of the organization with typewritten copies simultaneously. In other words, the telephone typewriter makes possible typewriting at a distance.

The telephone typewriter service was first used in 1917 by one of the large press associations whose exacting requirements it met admirably, but recently it has been adapted to other commercial users and particularly to large industries having a widespread organization.

As one feature of the program involving the new communication system of the New York City Police Department, a telephone typewriter switching system has been installed which provides communication between General Police Headquarters, Manhattan, and all

the borough police headquarters and to all the Manhattan precincts, also from each of the four borough headquarters outside of Manhattan to each precinct station in that borough and to other strategic points. The complete system comprises more than 100 telephone typewriter sets.

This service was officially turned over to the Police Department by the New York Telephone Company, Mayor Walker sending the opening message in the presence of President McCulloch and other telephone and police officials. The following day a stolen truck containing \$10,000 worth of merchandise was recovered forty-five minutes after its loss was reported, through a description sent to all precincts in Manhattan by the aid of the system.

The system is arranged so that an operator at headquarters may send from a keyboard to any one precinct, to any group, or simultaneously to all precincts, the messages being printed automatically in page form at the receiving machines, which are placed close to the desk of the officer in charge of the precinct. A signal lamp is associated with each line so that the receipt of a message may be acknowledged by each station. Lines are also provided for incoming messages from the headquarters in the other four boroughs.

Telephone typewriter service is also being furnished on a somewhat smaller scale to the police departments in St. Louis and Boston, and to twelve cities in Connecticut whose police headquarters are interconnected.

A LONG RECORD ON WEST COAST

JOHN NELSON, Seattle, Wash.

Forty years a telephone man, with but sixteen days off the job because of illness, is the record of John Nelson of Seattle, Wash., who has just been honored by the Pacific Telephone and Telegraph Company with a gold emblem of six stars, indicating forty years of unbroken service.

When Seattle had its historic fire in June of 1889 it was John Nelson who climbed a telephone pole outside the fire zone and made an emergency connection with the one line leading out of town over which calls for help were sent to Tacoma. When John Nelson became a telephone man there were only 200 telephones in the whole town of Seattle. About two years ago Seattle installed its 100,000th telephone and Nelson assisted with the installation. John Nelson also worked on the first Long Distance telephone line across the Cascades from the Sound to Yakima, and on innumerable other pioneer lines in the northwest. Of late years he has served as Supervising Foreman of aerial construction in the city of Seattle.

WHAT HAPPENS WHEN THE KING TELEPHONES

**The British Ruler Gets Special
Privileges When He Makes
Toll Calls**

Not long ago Pearson's Weekly in London published an interesting story about what happens when the King uses the telephone.

When the King desires to make use of the telephone to converse with anyone outside the London area, whether it be to the Provinces or to the continent, he has the privilege of claiming the first clear line at the exchange, and while he is speaking, no telephone operator can interrupt to warn either him or the listener that the time limit for the call has expired.

If you should go to London and desire to put a call through to the King at the Buckingham Palace, you would be connected with the office of his private secretary, as no call is put through direct to the King except from a member of the Royal family. In such case, the operator connects the caller with the king's private writing room.

Marlborough House, where the Prince of Wales has taken up his residence, was the first royal residence in Great Britain to have a telephone installed. This was a private line connected with the London fire brigade and with Scotland Yard, but even before that line was constructed, a room-to-room telephone arrangement was installed from the schoolroom to Queen Alexandra's boudoir.

THE LARGEST P. B. X. SWITCHBOARD IN COMMERCIAL USE IN THE WORLD

The largest private commercial telephone exchange in the world has been installed in the offices of the Consolidated Gas Company of New York. This mammoth board was recently dedicated at a ceremony attended by over 100 officials and was formally accepted by George B. Cortelyou, President of the Consolidated Gas Company and former Secretary of Commerce.

This switchboard consists of forty-one operating positions and one trouble position, with an ultimate of seventy-five operating positions and initial equipment of 2,240 extensions; 300 central office trunks; 60 tie lines and ultimate equipment of 3,600 extensions and 900 trunks and ties. The special equipment includes the Chief Operator's desk, automatic supervision of 260 tie lines to distant boards, special holding cords, peg count message registers at each position, and a checking set on the Chief

Courtesy Consolidated Gas Co., N. Y. Operator's desk, switchboard position clocks and ticket holders.

This private exchange will employ fifty operators in all, forty-one for regular duty and nine in reserve. The growth of the use of the telephone in this concern is shown by the fact that in 1897, the Consolidated Gas Company had only one operator, and prior to that date, but two wall telephones, one of which was for incoming calls and the other for outgoing messages. By 1911, the number of operators had increased to six, and by 1914, to twelve.

The board contains 60,000 jacks for connecting plugs, 4,500 lamps, 10,000 relays, 75,000 feet of cable divided into approximately 4,000 different pieces, and is 125 feet in length and contains as much as 6,000,000 feet of wire. The board will handle between 12,000,000 and 15,000,000 calls annually.

DISPERSAL SALE

Having decided to replace my herd with pure bred Holsteins, I will sell at Public Auction my entire herd of high grade Holsteins on the Klein Farm, located 1 mile south and 1/2 mile east of Orland, 7 miles north of Lincoln Highway, 1/2 mile east of Route 51 on stone road, commencing at 1:00 o'clock on

PIG INCUBATOR

Best Equipment For McLean System

YOU can farrow pigs in zero weather with 100% safety—get two litters yearly from each sow—and make the early markets when hog prices are highest with this

ECONOMY HOG HOUSE
—a perfect farrowing house which ten minutes work changes into a year 'round hog house. This house has separate pens for six sows and their pigs; has brooder stove in center with six separate little pig pens under it where pigs can keep warm and away from sows. Keeps them warm in coldest weather. Five covered pens and brooder gate protect pigs from being laid on. Makes early farrowing profitable.

Best for McLean System
Rests on skids. Easily moved. Good for owners or renters. Sanitary. Well ventilated. Two men can put up in two hours, by bolting sections together. Painted. Has weather proof roof and cello-glass, top ventilating windows. Built of clear fir and No. 1 dimension lumber.

Raise 16 to 20 Pigs Per Sow Yearly
Hog raisers all over the hog belt are doing this. So can you by using the Economy Hog House the year round. Actually costs less than if you built it yourself. Get this patented, centrally heated hog house now and make more money over before.

ECONOMY BROODER HOUSES
—Two Sizes
11 Year Around Hen Houses—Two Sizes
Brood Your Chicks Without Losses. These brooder houses will do it. Come in and see them any time or write for information.

Paint Your Lawn Green!
An early start is essential with new spring lawns. As soon as the frost is out of the ground and the soil can be worked, begin preparing the seed bed.

Thorough preparation is important. The subsoil must be dug deeply and carefully leveled and worked. Grass will not grow through clods. If necessary, several inches of good black soil, evenly spread on top, will complete the preparation. The next important step is to broadcast 40 pounds per 1000 square feet of

MARLEY CHURCH NEWS

SUNDAY MARCH 10—Sunday School 10 a. m. Church services 11 a. m. Sunday Evening Club 7:15 p. m.

Next Sunday the lesson under discussion in the Sunday School is, "The place of Baptism in the Christian Life." The story contest is arousing much interest among the older children.

Rev. A. R. Wakeland gave a helpful talk Sunday evening to the members of the Sunday Evening Club on "Is the Universe Friendly?" His subject for next Sunday is "What is the Function of Prayer and Faith in the Scientific Age."

Wilson Gillett has secured a position in Shrigley's Bakery in El Paso, Illinois.

Mr. and Mrs. Ralph Bell moved from the house recently sold by Rev. Rust into the Jesse Marshall house.

Dean Gillett called at the Ed. Gillett home last week.

The J. R. Sproat family spent Sunday at the home of Mrs. Ida Lucas, in Worth, Illinois.

Mr. and Mrs. Alfred Sproat, Mr. and Mrs. Albert Kercheval were the Sunday guests of Mr. and Mrs. Erwin Lynk of Chicago.

Mrs. A. R. Wakeland spent Saturday in Chicago.

Mrs. Lucia Marshall is spending a few days with her daughter, Mrs. Frank Storm.

Miss Agnes Haley was a Joliet caller last Thursday.

Mrs. John Day entertained over the week end her son and wife, Mr. and Mrs. Williams and nephew Hugo Ideler of Chicago.

The Marley Dramatic Club has discontinued its meetings until the last week in March.

Mr. and Mrs. Spiess recently entertained at their home, Mr. and Mrs. Homer Chambers and son Dwight of Chicago.

The Household Science Club will meet with Mrs. John Day next Tuesday, March 12. The program will consist of talks on American composers and musical appreciation and what jazz is. There will also be a study of the Constitution and Current Events.

Ralph Cutler was suddenly taken ill with pneumonia Monday morning. He was taken to the Silver Cross hospital by Dr. E. G. MacMahon of Mokena.

Rev. and Mrs. Henry Rust left in their car for Sheffield, Iowa Monday morning. They expect to arrive there about the same time as their household good which has been shipped by rail.

Messrs. Richard Gorham and Charley Hass attended the Milk Producers meeting in Joliet Monday morning.

Mrs. Spiess entertained at Sunday dinner her brother and his daughter, Daniel Marti and Alice of Kankakee, her brother Albert Marti and Miss Mildred Savage.

Mr. and Mrs. Julian Gorham attended the A. B. C. Bunco Club in Joliet Friday night. The ladies of the club were entertaining their husbands.

Mr. and Mrs. H. Gohasen of Chicago, Mr. and Mrs. A. Kohl of Joliet visited with Mr. and Mrs. Chas. Bostrom Sunday.

Mr. Richard Gorham made a trip to Chicago Friday night where he enjoyed a meeting of his lodge in the Medinah Temple.

Mrs. H. H. Sabin and Mrs. Fred Blodgett spent Tuesday afternoon in Joliet where they attended the Household Science Board meeting.

MOKENA

Eleanor, daughter of Mr. and Mrs. J. V. Hall is on the sick list. Mrs. Florence Hamilton and daughters of Joliet visited at the Don Hall family the past week. Word comes from Mrs. Julius Hirsch that she is enjoying her sojourn in Hollywood, Florida.

Rev. Wm. Kreis of Delton, Illinois visited with Mokena friends Tuesday. Mrs. Erhardt Oswald, Sr., who returned from Joliet where she has spent the winter, is now staying at the home of her son Erhardt, Jr.

John F. Schultz, George Knudson and Christ Braun are on jury service in Chicago.

Mrs. Wm. Schmuhl entertained at dinner Tuesday noon a number of ladies of the St. John Ladies Aid who spent the afternoon sewing carpet bags.

The Ladies Aid of the M. E. church will be entertained at the home of Mrs. Oscar Klose, Sr., on Thursday afternoon, March 14th.

Born to Mr. and Mrs. J. H. Nord-sell, a daughter Tuesday night.

Mr. and Mrs. F. M. Story and son Chester motored to Elgin last week end and visited with Mr. and Mrs. Gromer and family.

Let Us Laugh

"I've just shot a dog."
"Was he mad?"
"Well, he wasn't very pleased."

Mrs. Meyers—"What is your husband's average income?"
Mrs. Beyers—"Oh about one A. M."

Plumber—"I've come to fix that old tub in the kitchen."
Youngster—"Mama, here's the doctor to see the cook."

SHEILA IS QUEEN

Photo Shows—Miss Sheila La Gae, 19, a college student, will represent her native state, California, in the international beauty contest which will be a feature of the forthcoming pageant, in Havana, Cuba. Sheila will be entered in the contest as "Miss California."

TWO STARS UNSCRAMBLE EGGS

An opera star shows a cuisine star how to unscramble eggs, or, more properly, how to make spaghetti a la Mussolini. Cesare Formichi, baritone of the Chicago Civic Opera (right) demonstrates to Jacques Lindauer, chef of the French liner "Ile de France," how, when and why to mix the necessary ingredients that go into the making of spaghetti—Mussolini style.

AG. RESEARCH AIDS ILLINOIS FARMERS

U. of I. College of Agriculture Outstanding for Discoveries.

From the rose grower of the Chicago district to the pasture owner of the southern section, there is not a tiller of soil in Illinois who has not benefited from the investigations and studies which have made the experiment station of the College of Agriculture, University of Illinois, a front-rank institution of its kind.

Illinois, for instance, has led the world in corn breeding. It was at this state's experiment station where the discovery was first made that the composition of corn could be markedly changed at will by breeding.

One of the decidedly practical things that has come out of the Illinois station's researches on corn breeding and corn diseases is the score card for utility corn. Before this score card was set up as a standard for good seed corn, the ideal ear of corn frequently proved a disappointing parent. Many times a sample placed high in the showroom proved to be inferior to a very ordinary looking sample when the two were tested in the field. Researches at Illinois station and by other investigators disclosed a whole group of fungous and bacterial diseases of corn. Now, it is recognized that the root, stalk, ear and cob-rot diseases of corn are one of the greatest stumbling blocks in the way of more efficient corn production. Fortunately, the disease-resistant, utility-type standard which grew out of the station's research on corn diseases is making it possible for corn growers of the state to cut down losses that have been running into millions of dollars every year.

One of the more recent station investigations benefiting Illinois' \$800,000,000 corn crop is the work on the treatment of seed corn with chemicals for the control of the seed-borne corn-rot diseases. This work has been done in co-operation with the federal Department of Agriculture. It has been found that treatments with chemicals costing at the rate of only three cents an acre will control certain of the diseases and thus save at least part of the heavy toll now being taken by diseases and disease-susceptible seed.

Any fears that the experiment station is making the surplus problem worse by teaching more efficient production are dispelled by the trend of corn production figures. Being able to grow more corn on an acre has only meant that farmers could do the highly desirable thing of converting some of their corn land to such crops as legumes, thus improving their rotation systems, building up their soils and securing an unmatched type of farm-grown forage feeds. This is actually what has happened. In Illinois the acreage of corn has been decreased from about 10,200,000 acres in 1910 to about 9,600,000 acres in 1928. With this decrease in corn acreage has come an increase in the acreage of legume crops. In the case of soy beans the acreage has increased from a few thousand acres prior to 1916 to about 416,000 in 1928, alfalfa has spread from about 90,000 acres in 1919 to 201,000 in 1928, while sweet clover has increased from 48,000 acres in 1919 to 619,000 acres in 1927.

It remained for the Illinois experiment station to discover the general absence from Illinois soils of the alfalfa bacteria, without which the greatest of all forage crops cannot be successfully grown; that bacteria of the common rank-growing sweet clover could be used for alfalfa inoculations and that limestone was needed on the acid soils before the nitrogen-gathering bacteria could live and flourish on the roots of the leguminous plants.

The Illinois station is rather generally recognized as having done more than any other one in the country to make the best cattle feeding business more profitable for farmers. Dean and Director H. W. Mumford, who spent 21 years developing the animal husbandry department before he was appointed to his present position, inaugurated the practice now common with all experiment stations of using carload lots instead of just a few cattle in feeding experiments, thereby overcoming the inadequacy of the results from these feeding trials.

The Illinois experiment station was one of the first to recognize the importance of farm marketing studies. Dean and Director Mumford, while serving as head of the animal husbandry department, did pioneer work in standardizing market classes and grades of live stock. The series of bulletins on market classes and grades of cattle, swine, sheep and horses, which he prepared after much investigational work on the Chicago and other live stock markets, was the only one of its kind and naturally was hailed as a valuable contribution to animal husbandry literature. Far from resting on its early-won laurels in the field of marketing studies, the experiment station is giving increased attention to such problems, as indicated by the number and kind of such investigations which have been completed since then and the list of those which are in progress at the present time.

Research methods had never before been applied on so large a scale as in the case of orcharding studies which the station conducted almost 30 years ago on bitter rot, curculio, dust spraying, codling moth and spraying-in-the-bloom. Investigators of the station not only discovered for the first time in history the cause of bitter rot, a disease which in 1900 was estimated to have destroyed one and a half million dollars' worth of apples in four counties alone, but furthermore, by 1902, had worked out most of the life history of the fungus and demonstrated that 95 per cent of the fruit might be saved by four thorough sprayings with bordeaux mixture.

The dairy department alone has been responsible for enough new discoveries and facts to bring about almost revolutionary changes in farming and yet this department is only one of six major ones of the experiment station. The now widely-used method of condensing buttermilk was worked out by this department. Just recently it worked out a system of making condensed buttermilk out of skim milk.

DR. CALDWELL'S THREE RULES

Dr. Caldwell watched the results of constipation for 47 years, and believed that no matter how careful people are of their health, diet and exercise, constipation will occur from time to time. Of next importance, then, is how to treat it when it comes. Dr. Caldwell always was in favor of getting as close to nature as possible, hence his remedy for constipation is a mild vegetable compound. It can not harm the most delicate system and is not habit forming.

The Doctor never did approve of drastic physics and purges. He did not believe they were good for human beings to put into their system. Use Syrup Pepsin for yourself and members of the family in constipation, biliousness, sour and crampy stomach, bad breath, no appetite, headaches, and to break up fevers and colds. Get a bottle today, at any drugstore and observe these three rules of health: Keep the head cool, the feet warm, the bowels open. For a free trial bottle, just write "Syrup Pepsin," Dept. BB, Monticello, Illinois.

Horned toads are really lizards.

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done. For Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle. Unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Fletcher's CASTORIA

Helped at Change of Life

"Lydia E. Pinkham's Vegetable Compound is a wonderful medicine at the Change of Life. I would get blue spells and just walk the floor. I was nervous, could not sleep at night, and was not able to do my work. I know if it had not been for your medicine I would have been in bed most of this time and had a big doctor's bill. If women would only take your medicine they would be better."—Mrs. Anna Weaver, R. F. D. No. 2, Rose Hill, Iowa.

Teaching us by more persuasive
reasons,
How akin they are to human
things.

—Longfellow.

SEASONABLE DISHES

Cold weather lends itself to the enjoyment of heartier foods, such as boiled dinners. While many enjoy the ham bone cooked with vegetables, others who are fond of ham and bacon do not wish its flavors mixed with those of vegetables. The following is one of the old-fashioned dishes:

following is one of the old-fashioned dishes:

New England Boiled Dinners.—Prepare plenty of small hard cabbage heads—two or three will not be too many, for a boiled dinner should always be shared—a rutabaga or two if small, cut into eighths; one-half dozen even-sized onions, the same of potatoes and carrots. Getting the vegetables ready for a boiled dinner is not an easy task.

In a large preserving kettle place a three or four-pound piece of tender, quite fat corned beef, add two pig's hocks well scraped and cleaned, cover with cold water and bring to the simmering point. Cook for an hour or two before adding the vegetables. Par-boil some cranberry beans after soaking them over night, put into a small salt sack and drop into the kettle with the vegetables, cook all together slowly until the vegetables are tender and the meat well done. Serve on a turkey platter with the meat in the center and the vegetables arranged around it. Cut the salt sack after draining well and empty the beans into two heaps at the ends of the platter. "Much tasting means no wasting"; this is true of any dish and especially of a dinner of this kind; add salt—usually the meat is not salt enough to season all the vegetables—pepper may be added while cooking, a small chili, if desired.

Suet Pudding.—Here is another old-fashioned and always well liked dish: Take three-fourths of a cupful of corn meal, add a little cold milk and when well mixed add to a quart of hot milk, stirring until well mixed and smooth; cook for a few minutes, then add another quart of cold milk; put all into a deep crockery dish suitable for baking, add one cupful of finely chopped suet, one cupful of sugar, two beaten eggs, one cupful of raisins. Sift over the top on the floating suet two table-spoonfuls of flour; this will form the delicious brown crust after the pudding is baked. Put into a moderate oven and bake three to four hours, stirring the first hour or two, often, to keep the mixture well blended. Then finish baking. Serve hot. This pudding may be reheated until the last morsel is gone, and will still be good.

The pudding needs no sauce, but if liked richer serve with a spoonful of hard sauce.

Diet Hints.

Most of the people who do even a little study of food principles know that fried foods are hard of digestion. The laborer who works hard daily, often in the open air, may be able to digest foods that for the ordinary worker are out of the question.

In some homes fried potatoes are as common and daily a food as bread and butter; the family seem to thrive and grow on them, but a day of reckoning will come for those who abuse the stomach with greasy foods, the fat covering the starch so that the stomach cannot act upon it. As fat is not digested in the stomach and starch is only partly digested in the intestines, the result is disastrous. Of course, with perfect mastication there is some of the starch mixed with the saliva and stomach juices, but a large part of fat-covered food passes into the intestines imperfectly digested.

A very soft-cooked egg, a coddled, a medium, or a hard egg, is perfectly easy to serve, with proper care. The eggs should be at the room temperature for these results. To every egg use a pint of boiling water, drop in the eggs, cover closely and set on the back of the stove where they will keep hot but not cook with the heat. If one wishes a soft egg remove it at three to four minutes; if coddled, six to eight minutes; if medium, leave twelve to fifteen minutes; a hard egg will need one-half hour's cooking. A hard egg cooked in this way will be tender and digestible, the yolk dry and mealy, as easy to digest as a soft egg and, in many cases, easier.

Every child should be taught the proper making of toast. The bread should be rather dry, then further dried by heating in the oven, then toasted until brown and dry to the center. Toast that is served well browned on the outside, with all the moisture driven to the center, is not properly made, nor hygienic toast; when eaten a soggy indigestible mass is given the stomach to break up and soften.

Neenie Maxwell

QUAINT FLOUNCED TAFFETA; LACE-TOUCHED NAVY FROCKS

IS THERE romance in clothes? Suppose we let this picture of a bewitching gown for "sweet sixteen" answer the question. The eyes carry it unanimously.

Those "first parties" so exciting to the sub-deb—what perplexities they impose upon doting mothers in the way of choosing just the prettiest and the loveliest the world affords for daughter to wear.

The naive sunny-yellow rayon taf-

to wear with the colorful taffeta party frock must be dyed a perfect match if one would dress in perfect fashion.

The outlook for sheer navy daytime frocks with a touch of lace either worked into the making of the dress or as an accessory item is most promising.

This season the word sheer applies to woollens as well as cottons and silks. Nowadays one may be as comfortably and charmingly attired in a woolen

Modish for the Sub-deb.

feta frock illustrated is everything that it should be for youth. Perhaps one of the happiest things about it is that it can easily be made at home. There's nothing intricate about it—a good pattern, a few yards of taffeta, deft fingers, a willing mind and the deed is done!

The bowknot of self-fabric formed of milliner's folds is a master stroke when it comes to trimming a whole frock with "the touch that tells." And aren't those quaint ruffles, one topping another, adorable? The hemline tips up in front just enough to satisfy fashion's demands. The bodice is slightly form fitting, which is the latest style dictum for evening frocks.

Of course the color symphony for this frock could be carried out in any one of a dozen other "delicious" colorings, but it's just this way: All the yellows from daffodil to deep orange have captured Dame Fashion's fancy

georgette as in a diaphanous chiffon—all because fabric specialists have accomplished truly wonderful feats recently in the way of producing woollen weaves of amazing lightness.

These dainty woolen frocks in solid dark tones look their handsomest when feminized with a touch of lace. Collar and cuff sets are especially youthful and they will be very much in vogue on the new navy frocks. The most recent lace collars stress soft jabot effects. In the picture two screenland favorites, Mary Philbin (to the left) and Kathryn Crawford are choosing to take a spring stroll clad in demure navy frocks enlivened with a bit of lace at throat and at wrist lines. The soft jabot effect, just referred to, gives an exceedingly smart lace touch to the two-piece frock to the right.

The fact that the navy wool frock to the left is inclined to be form fit-

Two Pretty Daytime Frocks.

and she is making a big play on these shades for spring and summer.

Pale green is another favorite with the mode for party wear. As to white, be it taffeta, satin or chiffon, the outlook is that it will lead by a big majority when summer comes. There is supposed to be a note of color somewhere about the white costume in the way of a flower, a fan or a pair of gay slippers. Or perhaps the wrap, probably of transparent velvet, will supply the color needed to glorify the picture.

Speaking of the coat of transparent velvet, its vogue for spring is already told. Designers are creating lovely ensembles of sheer materials topped with transparent velvet wraps. We forgot to say that satin slippers

ting is significant. The present-day silhouette is changing, the "last word" stressing the princess-cut bodice top with a low flare—in this instance achieved by fine plaiting.

Speaking of new lace accessories, a most popular item is the cape-collared very deep in the back, sloping narrower over the shoulders from whence it is brought to the front in long lace streamers which tie in a soft bow.

Dressmaker touches of lace express a new artistry in that they are introduced with utmost ingenuity and rare discretion so as to give a perfect finesse to a perfect gown.

Garfield Tea

Was Your Grandmother's Remedy

For every stomach and intestinal ill. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements of the system so prevalent these days is in even greater favor as a family medicine than in your grandmother's day.

The Proper Thing
"What shall I wear for my screen test?"
"Something filmy, of course."

The Reflections of a Young Married Woman

are not pleasant if she is delicate, run-down, or over-worked. She feels "played-out." Her smiles and good spirits have taken flight. It worries her husband as well as herself.

One woman says:—"I was suffering from inward weakness and nervousness, could not sleep, this caused me to become all rundown and in a weakened state of health. I had severe pains through the back of my head and neck. I had read about Dr. Pierce's Favorite Prescription being good for women in my condition, and it relieved me of my weakness and nervousness, also the pains in the back of my head. I gained back my strength and felt just fine. I would advise any woman who suffers as I did to take the 'Prescription.'"—Mrs. Edna D. Darden, 1945 Franklin St., Fort Wayne, Ind. All drugists.

Write Dr. Pierce's, Buffalo, N. Y., if you desire free medical advice.

IF MOTHERS ONLY KNEW

During these days how many children are complaining of Headache, Feverishness, Stomach Troubles and Irregular Bowels and take cold easily. If mothers only knew what Mother Gray's Sweet Powders would do for their children, no family would ever be without them for use when needed. These powders are so easy and pleasant to take and so effective in their action that mothers who once use them gladly tell others about them. Save yourself a night of worry, by getting a package at your drugist today. Trial Package sent FREE. Address Mother Gray Co., Le Roy, N. Y.

When You Catch Cold Rub On Musterole

Musterole is easy to apply and works right away. It may prevent a cold from turning into "flu" or pneumonia. It does all the good work of grandmother's mustard plaster.

Musterole is recommended by many doctors and nurses. Try Musterole for sore throat, cold on the chest, rheumatism, lumbago, pleurisy, stiff neck, bronchitis, asthma, neuralgia, congestion, pains and aches of the back and joints, sprains, sore muscles, bruises, chilblains, frosted feet—colds of all sorts.

To Mothers: Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

STATE CAPITOL NEWS

The three-cent gasoline tax bill is still the center of attraction in the general assembly. This bill has created unusual interest in both Chicago and the downstate. Chicago is opposed to the bill and downstate is for it. Gov. Louis L. Emmerson is supporting the downstate side of the question. The bill as it stands provides for a three cent tax, two of which will go to the state for the completion of the state's road bond issue and one cent to counties for road construction under state supervision. Seventy-seven votes are required to pass any bill in the house.

Attorney General Oscar E. Carlstrom gave the principal address before the organization promoting the Lincoln memorial highway connecting Hodgenville, Ky., the birthplace of Abraham Lincoln with Petersburg, Menard county, the home of Lincoln during his youth. The meeting was held in Springfield at the St. Nicholas hotel at a luncheon. Attorney General Carlstrom assured the association of his personal and official support. This will be a highway of considerable historical importance not only for Illinois but for the entire nation. Other speakers on the program were Honorable Homer J. Tice, chairman of the appropriations committee of the house, and Senator Epler C. Mills of Virginia. The chairman of the meeting was C. G. Weaver of Oakford, Ill. Every county adjoining this highway from the Indiana line to Petersburg sent a representative.

Mrs. Lottie Holman O'Neill, Downers Grove, introduced a bill in the house of representatives reducing the automobile license fee in Illinois.

Harry H. Cleaveland, director of the department of public works and buildings, told four hundred engineers at the University of Illinois that it is very important to have the three-cent gas tax in Illinois. He explained that it is the only way in which the state can keep faith with the people. The completion of the present hard road system depends upon the passage of the gas tax. The entire matter was gone into in detail by Director Cleaveland and he explained that if the gas tax was not levied that the building of hard roads will have to stop after this year.

Senator Victor P. Michel's bill giving municipalities of the downstate authority to levy a tax of one mill for the construction and maintenance of airports and landing fields has passed the senate. The bill carries an emergency clause which has been sent to the house.

Senator Harry Wilson of Pinckneyville introduced a bill providing for a campaign to buy Illinois products. The bill provides that the governor appoint a commission of nine members. It will be the duty of these nine members to organize a campaign that will promote the growth of Illinois. It carries an appropriation of \$20,000 for expenses but the members of the commission serve without pay. The bill provides for a secretary with a salary of \$4,200 a year.

Two men were acting governors of the state from February 28 to March 6. Senator Martin R. Carlson, Moline, president pro tem of the senate, held that position from February 28 to March 2 after which Lieut-Gov. Fred E. Sterling, Rockford, assumed the position until Governor Emmerson's return from the Washington inaugural ceremonies on March 6.

William W. Durgin, said to be the last survivor of the group of Union soldiers who acted as a bodyguard and escort for the body of President Lincoln after his assassination in Washington, died in Lovell, Maine, a few days ago at the age of ninety. Durgin and his companions accompanied the body on the trip to Springfield and followed it to the grave.

Representative Gordon W. Childers' bill which would take convict labor from the open market has been voted out of the house committee on industrial affairs with the recommendation that it pass. The bill permits the employment of convicts in the construction of state buildings, state institutions and the manufacture of products to be used by the state, cities, counties and townships. It also permits the use of convict labor on state highway construction.

The number of hogs in Illinois is 9 per cent less than at this time last year according to the reports of the Illinois and Federal departments of agriculture.

In order that the University of Illinois may catch up with its building program as originally planned ten years ago, the board of trustees of that institution will ask the general assembly to restore a portion of the money asked for but denied in 1921 so that overcrowded conditions of the Chicago departments, especially medicine and dentistry, may be relieved. Therefore the trustees have voted to ask for operation for the coming two years \$9,530,000, and for buildings and other permanent improvements, \$2,600,000, a total of \$12,130,000.

If strip mining leaves ground that would cause injury or annoyance, then it will be considered a nuisance and it would be constitutional for the legislature to adopt measures to correct the nuisance. This opinion was given by Attorney General Oscar E. Carlstrom to DeWitt Billman, secretary of the legislative reference bureau. Mr. Billman advised General Carlstrom that several members of the association had inquired pertaining to such a bill. If such a bill would become a law then companies operating strip mines would be required to level off the ground and remove any unsightly obstructions.

Senator Adolph Marks, Chicago, has offered a bill providing for a police commission of five appointed by the governor to have charge of the police force of the city of Chicago. It will be the power of the board to select one member to act as chief commissioner. Each member would draw a salary of \$5,000 a year. Senator Marks referred to the successful way in which such a system works in New York.

The Supreme court of Illinois has upheld the constitutionality of the legislative primary act which authorizes the senatorial committee of a political party to designate the number of candidates to be named in a district. In this same opinion the court denied the petition of Oscar Lindstrom and others from Chicago for a petition for mandamus to compel the state canvassing board to certify their names.

A special train bearing Governor and Mrs. Louis L. Emmerson and about one hundred other people left Springfield Thursday, March 28, to attend the inaugural ceremonies in Washington. The party plan to return March 6.

Employment by the state of disabled veterans was advocated in a resolution presented by Representative David Hunter of Rockford. He suggested a committee of three service men, appointed by the governor, one senator named by the President and two representatives picked by the speaker be appointed to wait upon and advise with state officials relative to filling vacancies by disabled veterans.

Representative W. C. Cheynoweth, Decatur, has offered a bill removing blind employees from the provisions of the compensation act. The bill has been sent to the judiciary committee for consideration. Representative Clinton Searle, Rock Island, has offered a bill appropriating \$200,000 for an arsenal at Rock Island. This bill has been referred to the committee on appropriations.

In line with his administration policy of retrenchment and economy, Governor Emmerson has directed State Fire Marshal S. L. Legreid to drop from the fire prevention pay rolls forty-three persons and to close the branch office of the division at Chicago. The act was the first of the new governor after looking over reports showing the financial condition of departments and divisions. The governor ordered the marshal to discharge all employees, except one assistant fire marshal, one investigator and two stenographers and to close the Chicago branch which will mean a saving of \$7,000 a month.

States were held to be powerless to fix the price of gasoline by a recent ruling of the United States Supreme court which called such a law invalid in Tennessee. The court asserted that it had repeatedly declared that a state legislature was without constitutional power to fix prices at which commodities may be sold, services rendered or property used, unless the business or property involved was "affected with a public interest." Its opinion, handed down by Justice Sutherland, to which Justice Holmes dissented, declared that gasoline is one of the ordinary commodities of trade, and that dealing in it, irrespective of its extent, does not affect it with a public interest.

Early reports from the limestone quarries indicate that Illinois farmers used more than 700,000 tons of limestone in 1928, says the Illinois Agricultural association. While only half of the total tonnage figures are in from the 22 companies under contract with I. A. A., these reports show that the 1928 tonnage when finally determined will be exceeded only by that of 1925 when 800,000 tons of limestone were spread on Illinois farms. The 22 companies operating under agreement with I. A. A. handled approximately 85 to 90 per cent of all the limestone sold in the state. The heaviest-using territory for agricultural limestone in Illinois is the wheat-growing area in some eight or ten counties in the St. Louis territory. The soil in this region is decidedly acid for the most part and cash returns from the wheat crop come at a time when limestone can be most conveniently bought and spread.

Hon. Frank S. Dixon, formerly adjutant-general for the state of Illinois, was presented with a beautiful Illinois movement watch by his friends in Trenton. General Dixon went to Trenton the latter part of the recent campaign to make a speech and his friends were so well pleased with the speech that they remembered General Dixon with the watch.

Senator Mason, Chicago, has introduced a bill that will make it severe for anyone to drive an automobile while intoxicated.

Improved Uniform International Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean Moody Bible Institute of Chicago.)
(© 1929, Western Newspaper Union.)

Lesson for March 10

BAPTISM AND THE LORD'S SUPPER

LESSON TEXT—Matt. 3:13-17; 28:19, 20; 1 Cor. 11:23-29.
GOLDEN TEXT—This do in remembrance of me.

PRIMARY TOPIC—Two Things God Wants Us to Do.

JUNIOR TOPIC—Two Things God Wants Us to Do.

INTERMEDIATE AND SENIOR TOPIC—The Meaning of Baptism and the Lord's Supper.

YOUNG PEOPLE AND ADULT TOPIC—The Place of Baptism and the Lord's Supper in the Christian Life.

I. The Baptism of Jesus (Matt. 3:13-17).

1. His request (v. 13).

This was in fact, if not in word. He came from Galilee to Jordan to be baptized of John.

2. John's hesitancy (v. 14).

He perceived something in Jesus which impressed him with the unfitness of such an act.

3. Jesus' explanation (v. 15).

He insisted upon John's compliance on the ground that it was a method of fulfilling all righteousness.

4. The Heavenly acknowledgment (vv. 16, 17).

As Jesus emerged from the waters the heavens were opened, the Holy Spirit descended, and a voice declared, "This is my beloved Son, in whom I am well pleased."

II. The Apostolic Commission (Matt. 28:18-20).

1. The authority of Jesus (v. 18).

God gave Him all authority in heaven and on earth.

2. The Commission of the Apostles (vv. 19, 20).

(1) It was to teach (make disciples of) all the nations (v. 19).

(2) Baptize believers (v. 19).

This baptism, the divinely appointed way of making public confession, is to be in the name of the Father, Son, and Holy Ghost, indicating that the believer has been brought into definite relationship to each member of the Holy Trinity.

(3) Teach obedience (v. 20).

Profession is not enough; it must issue in obedience.

3. The all-sufficient promise (v. 20).

The Lord told the disciples their difficulties would be great after He had gone away, but promised them the presence and fellowship of the all-powerful Savior and Lord.

III. The Lord's Supper (1 Cor. 11:23-29).

1. Its Institution (v. 23).

(1) Time.

It was on the night of the betrayal of Jesus, just after the betrayer had been announced.

(2) Circumstances of.

It was in connection with the eating of the Passover (Matt. 26:26).

(3) The elements used. Bread, doubtless common bread of the Passover feast. The cup, fruit of the vine.

2. The Significance of the Lord's Supper (vv. 24-26, cf. Matt. 26:26-28).

Jesus took material things and made them to be symbols of His own body and blood.

(1) A memorial of the Lord (Luke 22:19) to be observed in remembrance of Him.

(2) To show the Lord's sacrificial death (v. 26). He did not die as a hero, or as an example of unselfish devotion, but as a substitutionary ransom.

(3) It is a guarantee that our sins are forgiven (Rom. 4:25).

(4) It symbolizes the believer's reception of Christ (1 Cor. 10:16).

(5) A forward look to a completed redemption (1 Cor. 10:26).

3. Qualifications for participation in the Lord's Supper (vv. 27-29).

(1) A proper apprehension of its meaning (v. 27). Eating and drinking unworthily primarily refers not to the demerit of the communicant, but his failure to grasp its meaning and importance.

(2) Church membership (1 Cor. 11:18-22).

The Lord's body is the church, which is composed of regenerated men and women united to Jesus Christ as head and to each other as members of that body by the Holy Spirit.

3. Orderly walk.

Conduct which disqualifies for participation in the Lord's supper:

(a) Immoral Conduct (1 Cor. 5:1-13). It is most perilous for one who is guilty of immorality to approach the Lord's table (1 Cor. 11:30). Sickness and death are often visited upon such.

(b) Heresy (Titus 3:10; 1 John 4:2, 3).

(c) The one who stirs up a schismatic strife (Rom. 16:17) in the church should be excluded from the Lord's table.

Clean Hands and Pure Heart

Who shall ascend into the hill of the Lord, or who shall stand in His holy place? He that hath clean hands, and a pure heart. He shall receive the blessing from the Lord.—Psalms 24:3-5.

The Smitten Cheek

That command about the smitten cheek is a command, condensed into a proverb against vengeful retaliation. This is not impracticable.—Dr. Wayland Hoyt.

Mother Tells How Milks Emulsion Saved Her Son's Life

"In November, 1918, I wrote you in reference to my son's condition at that time. He had just gotten over the flu and double pneumonia and it looked as if he would never be a well boy again. His lungs were very weak and he had an awful cough. We thought he was going into consumption. He had pneumonia four times. This had taken all of his vitality and left his lungs in a very bad shape.

"I saw Milks Emulsion advertised in the Birmingham News, got a large bottle and gave it to my son. It did him so much good that I kept on giving him Milks Emulsion until he had taken 125 bottles and now I am very proud to tell you that my boy is a well, strong young man, 18 years old, and in excellent health. I give Milks Emulsion the credit and praise for having saved his life.

"You can publish this letter if you like, as I am very grateful to you for what your Emulsion did for my son. MRS. J. A. BRADLEY, 1927 1/2 Avenue D, Apt. A, Birmingham, Ala."

Sold by all druggists under a guarantee to give satisfaction or money refunded. The Milks Emulsion Co., Terre Haute, Ind.—Adv.

Isle Knows No Winters

The Isle of Pines has one continuous summer, the variations of temperature throughout the entire year being scarcely as great as often occur in a single summer month in many of the Northern states. It is rare, indeed, when the thermometer in summer on the island registers as high as 90 degrees, and in winter the mercury never falls below 50 degrees.

Large, Generous Sample Old Time Remedy Sent Free to Every Reader of This Article

More than forty years ago, good old Pastor Koenig began the manufacture of Pastor Koenig's Nervine, a remedy recommended for the relief of nervousness, epilepsy, sleeplessness and kindred ailments. The remedy was made after the formula of old German doctors. The sales soon increased, and another factory was added. Today there are Koenig factories in the old world and Pastor Koenig's Nervine is sold in every land and clime.

Try it and be convinced. It will only cost you a postal to write for the large, generous sample.

Address: Koenig Medicine Co., 1045 N. Wells St., Chicago, Illinois. Kindly mention your local paper.

Huh!

Brown—Does your daughter read such?

Black—Well, from the kind of magazines and books I see her bring home I should say not much.

NICE WORDS WON'T DYE a dress or coat...

Neither pretty pictures nor colorful adjectives will dye a dress or coat. It takes real dyes to do the work; dyes made from true anilines.

Next time you have dyeing to do, try Diamond Dyes. See how easy it is to use them. Then compare the results. Your dealer will refund your money if you don't agree they are better dyes.

You get none of that re-dyed look from Diamond Dyes; no streaking or spotting. Just fresh, crisp, bright new color. And watch the way they keep their brilliance through wear and washing. They are better dyes because they contain plenty of real anilines—from three to five times more than other dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes

Improve the taste of milk this way—and your children will drink more of it

SAYS one of America's leading physicians: "Two tablespoonfuls of Karo in a glass of milk not only improves the taste of the milk but doubles its food value."

This doctor's advice is valuable—for he knows children and he knows Karo.

"Serve plenty of Karo to the kiddies—especially underweight children, in milk, on cereals, on sliced bread. Watch their weight increase!"

All children like the delicious flavor of Karo—it appeals to their "sweet tooth."

And—do you know why Karo is so splendid for children? Because each ounce of Karo contains 120 calories—the energy-giving value of Karo is nearly twice that of eggs and lean beef, weight for weight.

What is good for children is also good for the entire family.

Make Karo and pancakes a frequent breakfast habit.

Mokena News Notes

Continued from front page standing when the contest was finished.

GUESTS AT DINNER

On Sunday afternoon and evening, Miss Ethel Sorensen entertained at her home Mr. John Lauritzen and Mr. Iver Larson, both of South Chicago, and Miss Edna Newell of Mokena. Dinner was served by Mrs. Sorensen late in the afternoon and after a late supper Messrs. Lauritzen and Larson returned.

WRITES OF VALUE OF

TELEPHONE IN SELLING

The importance to manufacturers and wholesale dealers of using the telephone as an aid to increased sales has been emphasized recently by J. George Frederick, President of the Business Bureau, New York City, and author of a new book, "Selling by Telephone." Mentioning various applications of telephone salesmanship—such as making appointments for sales interviews, canvassing in order to secure leads for personal salesmen, development of suggestive selling by telephone as a supplement to the salesman's visits, and "Key-town Selling"—Mr. Frederick points out that while telephone selling is not an end in itself it is of indubitable value as an assisting service. This service, which results in conservation of the customer's time and a five-fold multiplication of sales contacts, is the factor making inevitable the widespread use of this modern variety of marketing.

FRANCE IMPROVES 'PHONES

A telephone construction program which will cost approximately \$3,800,000,000 francs and will require nine years for its completion is about to be undertaken by the French Ministry of Posts, Telegraphs and Telephones. This program includes the installation of automatic service in several large French cities, the extension of a system of underground long distance lines and the construction of various amplifying stations.

Facts About the Telephone

When President Coolidge and King Alfonso exchanged greetings by transatlantic telephone, the Spanish monarch spoke in English.

Philadelphia's first telephone exchange was established in November, 1878. In November, 1928, just 50 years later, there were 370,314 Bell telephones in operation in the city.

A transatlantic telephone conversation the other day resulted in the sale of 100 motorboats by a Michigan concern, representing a money value of approximately one-half a million dollars.

In 1889 the city of Los Angeles had just 1,000 telephones. The 100,000th mark was not reached until 1913. The other day Los Angeles' 350,000th telephone instrument was installed.

A modern telephone exchange, the first ever installed in the northwestern part of Africa, has been placed in service in the city of Ceuta, which is now connected with the telephone system of Spain and thus with France, England, United States and other countries.

BOUGHT "ALICE" BY TELEPHONE

The sale of the manuscript of Lewis Carroll's "Alice in Wonderland" to Dr. A. S. Rosenbach of Philadelphia was made by the transatlantic radio telephone. It was purchased at what is said to be the largest price ever paid for an author's original manuscript and was bought at an auction in London.

Indians' Peace Pipe

The peace pipe of the North American Indians was a tobacco pipe with a stem of reed or painted wood about two feet and a half long, decorated with feathers, with a large bowl, usually of red soapstone. After a treaty was signed, the Indians filled the calumet, or peace pipe, with the best tobacco, and presented it to the representatives of the party with whom they entered into alliance, the Indians themselves smoking out of it afterward.—Exchange

YOUNG MEN AND WOMEN WHO THINK CLEARLY THE GREATEST DEMAND OF AMERICAN BUSINESS

Bankers Association President Gives the Five Essentials of Sound Thinking in Business—Greater Opportunity Than Ever Before for Young People With Educational Training and Power to Analyze Problems.

By CRAIG B. HAZLEWOOD
President American Bankers Association

ONLY half a century ago Michael Pupin, a shepherd boy, guarded his flocks by night among the fields of Serbia. Thieves often lurked in the bordering cornfields awaiting an opportunity to make off with a part of the herd. Serbian boys were taught a method of signalling one another for warning and help. Each carried a knife with a long wooden handle which he would thrust deep into the ground and in case cattle thieves approached he would strike the wooden handle. The sound would be transmitted through the ground to other boys some distance away who could hear and interpret the message.

CRAIG B. HAZLEWOOD

"Why is it," Pupin asked his mother, "that we can signal this way? Why is it the sound can be heard through the ground, but not through the air? Why is it the signals can be heard in the pasture land so much better than in the plowed fields?" The boy's mother could not answer his questions, nor could the village teacher. However, having an eager mind and great determination, the boy decided to go to America, where he might win an education and find out the answers to these and other perplexing questions. Hundreds of other boys under the same circumstances and with the same set of conditions merely accepted these things without once questioning them just because they had always done them that way.

The Land of Education and Success

So a penniless immigrant boy from Serbia at the age of fifteen landed in New York in 1874 and, years later, having worked his way through Columbia University, concentrated the wonder and simplicity of his mind upon the problem of sound, which had puzzled him as a shepherd boy. The results of his thinking—what he has accomplished for the long distance telephone and for radio communication by his inventions—are known to the world over. "If during the past twenty-two years this company had been compelled to do without one invention of Michael Pupin," an official of the American Telephone and Telegraph Company once said, "and yet give the same service it is giving today it would have had to spend at least \$100,000,000 more than it has expended."

These inventions, in which millions of dollars of capital have been invested, were the result of the thinking of a mere country lad who had the simplicity to wonder, the determination to know and the power to apply what he learned.

Stimulating the imagination and thinking is the greatest purpose of education. What American business needs more than anything else is young men and women to think—individuals who are not mentally anchored to tradition, who do not merely appropriate other people's ideas, but who are hard, purposeful thinkers, independent and unprejudiced, with the ability to concentrate and strike straight for the heart of a problem.

Business Needs Folk Who Think

America has astounded the world by its readiness in casting aside traditional viewpoints, disregarding traditional difficulties and pioneering new shortcut formulas in the realm of business. Business is undergoing epochal changes.

Business problems are crowding in upon us so rapidly that the executive knows not where to look for adequate help or relief. With the enormous increase in size and intricacy of business affairs the problems have become so complicated and the mass of information necessary to their solution so great that the "days are not long enough." The demand for managerial and executive ability is rushing ahead—the opportunity for young men and women who have the professional training and who develop genuine thinking power is greater than ever.

All business feels the same crying need for the men who see clearly and think conclusively. Wherever we look—manufacturing, wholesaling, retailing, banking, financing—new forces are at work. Vast movements are under way and executives are seeking light upon perplexing problems daily.

Let us consider briefly the five essentials of a sound thinker. If I were looking for a young man of exceptional promise I should hope, first, to find in him the simplicity to wonder. Every great advancement in business has been made by men who dared to wonder, who had the courage to inquire into present procedure and who had the audacity to ask whether something that had been done a certain way for a long time might not be wrong. Although the history of America's progress from its very discovery to the present time has shown the value of an inquiring mind, there is still an inevitable tendency in most men to accept in a docile manner the opinions, methods, supposed facts, procedures and processes of the past. With due reverence to the effort, the spirit, the accomplishments of the past, let us make it our rule that everything be looked at with the clear questioning mind of the scientist.

Business Requires an Open Mind

Second, among the essentials for sound thinking I would write down an open mind. We have mentioned freeing our minds from the influence of tradition. Let us think also without prejudice of personal feelings, desires or consequence. Let us seek only the truth. Mere surface reasoning must be discounted. Old "can't's" and "don't's" must be thrown into the discard. A man who has an open mind will do a great many things because he doesn't know they can't be done.

The third essential to sound thinking is knowledge—a thorough, comprehensive understanding of all the factors involved in a problem. It has been said that most problems answer themselves when the facts have been gathered. A well known student and teacher of business describes the method of attacking a problem as tearing it down, reassembling the problem and drawing the conclusion. There can be nothing but guess work or intuition unless the unknown quantities are discovered.

As a fourth essential sound thinking requires the capacity to generalize. How often we have seen men sweating and confused before a mass of details which they were utterly unable to classify and crystallize. We have the problem of sorting out the relevant, attaining a perspective and reaching a conclusion that can be defended against any attack. To certain minds this procedure comes naturally; to others training in the solution of complicated problems points the way out.

The Time for Action

Fifth among the essentials of sound thinking is the power to apply. A few individuals have minds that travel at random or in circles. Some have minds that even refuse to budge. But there are still others who naturally or through training have minds that can be directed straight through to the practical application of their thoughts. They refuse to compromise or to be thwarted in purpose before definite application of their ideas has been achieved.

It is possible, I believe, for young people to train themselves to an inquisitive attitude, an open mind and the ability to classify and interpret material step by step from the beginning of a problem to its final solution and application. Here, then, is the thought I would leave—the paramount need of business is sound thinking. Some may think I have overstated the case, have set too high a standard. They may feel that they are merely cogs in a machine. That, too, is a part of the problem. The only way to solve that is to find time and place in the day's work for thinking.

SCHOOL SAVINGS BANKING MOVEMENT REACHES IMPRESSIVE PROPORTIONS

Almost 14,000 of America's schools now have school savings banking plans in operation, and about four million pupils are learning systematic savings through this type of thrift, with deposits in excess of \$26,000,000, recent reports of the American Bankers Association's Savings Bank Division show. The schools included in the reports are attended by 4,609,825 pupils, of whom 3,980,237 are participants in the school savings banking plans as depositors. During the year these pupils received interest in the amount of \$947,610 on their deposits.

The reports gathered by the association also show that there are 38 cities in the United States in which a full 100 per cent of the grammar school enrollment is participating in school savings banking. The figures covering high schools show that in 47 cities 100 per cent of the attendance in this class are school savers.

NEW LENOX

A miscellaneous shower was given in the home of Mrs. Chas. O'Donnell, 205 S. Hebert St., Joliet last Thursday evening in honor of her sister, Miss Edith Wilson and her recent marriage to Willard Sayers, both of New Lenox. Thirty guests were present, all being girl friends of the bride. Buncos was played at seven tables and prizes were awarded to Mrs. Orville Holmes, of Joliet, first; Miss Gladys Morris, New Lenox, second; and Miss Irene Haines, New Lenox, 3rd Duplicate prizes were presented to the honored guest. Following the games, were cleared and spread with a green and white setting on which a lovely two course luncheon was served.

Mr. and Mrs. Clinton King and children, Billy and Jean visited with Mrs. King's parents, Mr. and Mrs. L. F. Wilson, Tuesday.

The Ladies Aid of the M. E. church was entertained in the home of Mrs. Bertha Werner Wednesday afternoon.

It was stated last week that the Camp Fire Girls bake sale was to be last Saturday, but the date is this Saturday, March 9th at 2 p. m. in the George Peterson store.

Mrs. Frank Skolen, many years a resident of New Lenox, died in St. Joseph's hospital, Joliet, last Thursday following a several weeks illness. Funeral services were held on Saturday afternoon from the home in Joliet and burial took place in the Maplewood cemetery at New Lenox.

Miss Laura Jones is doing nicely following an operation for appendicitis in the Silver Cross hospital at Joliet last Saturday morning.

A daughter was born to Mr. and Mrs. Robert Nelson last week.

TINLEY PARK

The Lions Club meets Monday night and a luncheon will be served. Louis Hermesmyer is working with the assessing squad.

Mrs. Wyman, Sr., who has been ill is improving.

The P. T. A. are rehearsing a play which they expect to present after Easter.

Mr. and Mrs. J. C. Funk and Mrs. John Swisher attended the P. T. A. play at Orland Tuesday evening. They enjoyed it.

The first new family moved into the new Elmore subdivision south of here this week.

The Rock Island has unloaded a carload of cinders to be used in filling up around the depot property.

The R. N. A. will sponsor a buncoparty March 12th.

GERMAN M. E. CHURCH
The Ladies Aid meets next Thursday with Mrs. Cleve Holstein.

Mrs. Christ Roemer is ill.

Sunday school 9:30 a. m. Sermon 10:30 a. m.

Practice has begun on the Easter program.

The basketball team plays Riverdale next Sunday at Saenger hall.

Three big games. Don't miss it.

BACHELORS GROVE LUTHER CHURCH NOTES

Special services will be held next Sunday at 10 o'clock. The English examination of the confirmation class will take place. The class is also to sing special hymns. The examination on the following Sunday will be in the German language.

The following will be confirmed on Palm Sunday: Raymond Schilling, Hilbert Siemsen, Walter Siemsen, Bertha Bormet, Rosie Bormet, Mabel Briethart, Lorena Mager and Adeline Reiher.

The Ladies Aid will be entertained by Mrs. Louise Huhnstock Tinley Park next Thursday, March 14.

The Y. P. S. are busily engaged practicing for a play to be given some time after Easter.

Henry Bechtstein, Jr., was greatly surprised on March 3rd Sunday evening in honor of his birthday by the German M. E. League. There were 46 present. The evening was spent playing games and other enjoyments after which a hearty supper was served and all report a very good time. All adjourned in the wee small hours.

NOTICE

All persons not having vehicle license on or before March 15th 1929 will be subject to a fine as prescribed by village ordinance.

H. A. Mager, Village Clerk.

The ladies of Tinley Park and vicinity are invited to inspect my up to date popular priced Easter Millinery for ladies, misses and for children. Miss H. Kennedy, Tinley.

Did It Ever Occur to You

That price is not the first thing to be considered in a job of printing! Throwing type together in a haphazard way does not require any knowledge of the printing art. That isn't the kind of work you want. But artistic typography in stationery and advertising reflects credit to any concern. Our knowledge of printing gained by long experience enables us to produce

MOKENA

MOKENA M. E. CHURCH NOTES
Rev. Beatty will preach as usual next Sunday evening.

The pastor has asked our people to read one of the Gospels, preferably St. Luke, between now and Easter. Many joined in with this Lenten activity last year. Our people are requested to attend weekly Lenten services at St. John's Church on Thursday nights.

Our people are asked to make some special sacrifice that might give a sacrificial offering the 7:30 o'clock in the morning service on Easter Morning. This offering will go for Missionary use.

Mrs. Harry Mall entertained 500 Club in her home last Wednesday. Prizes were won by Mrs. J. Walsh and Mrs. Harvey Reab.

The following from Mokena attended the Flower Show held in Hotel Sherman in Chicago last week. Wm. Lorenz, Mrs. F. A. Tooley, Albert Braun, Mrs. Frank Hirt, Jr., Mrs. Harry Mall, Mrs. Henri Schweser, Mrs. Arthur Hall and E. Clark.

Conrad Schenkel attended funeral of his cousin, Mrs. J. held in Monee Monday.

CARD OF THANKS

I sincerely thank the Mokena under fire department and neighbors for their help in fighting the fire at my home Sunday morning. I especially wish to thank H. Scheiblich for his promptness giving the alarm.

WILLARD MAR

FRANKFORT

Mrs. George Andrew had her leg and leg badly burned Monday evening while doing the family washing. She was pouring the boiling water from the boiler into the wash machine when the boiler slipped and boiling water scalded her leg foot. She is under the care of W. V. Hedges the past few days. She is resting better. The first days she had much pain.

Mrs. Ferdinand Bobzin has very ill. She has been having nose bleed very bad.

Monday night Charles Pfeiffer and sons Milton and Harold, Con Heisner and Manson LaHue attended the National Railway Race Show held in the Cokesium Chicago last Wednesday.

Mrs. Charles V. Waggoner, Clinton, Iowa spent Sunday in home of her parents, Mr. and Mrs. Frank J. Kohlhaugen.

Mrs. Frank Folkers celebrated her birthday in her home Friday evening at dinner. The guests were Mr. and Mrs. George Folk, Mr. and Mrs. Harry Goodnow, Elizabeth Kay all of Chicago, and Mrs. James Fulton of Tinley Park, Mr. and Mrs. Herbert Folk of Joliet, and Miss Florence Folk of Donovan, Ill.

Mr. and Mrs. Thomas McGowan of Joliet were Sunday guests Mr. and Mrs. John Clark.

Wm. Logan has as his guest Sunday his daughter and grandchild, Mrs. Albert Knater and daughter Lois of Chicago Heights. Born to Mr. and Mrs. Paul Chinsin, a son in Silver Cross hospital on March 5th.
